

Constipation & Biliousness

Sick-headache,
Pains in the back,
Sallow complexion,
Loss of appetite and
Exhaustion.

There is only one cure, which is

RAMON'S LIVER PILLS
AND
TONIC PELLETS

One Pink Pill touches the liver and
heaves the bile.

One Tonic Pellet gently acts as a
gentle laxative in keeping the bowels
open, restores the digestive organs, tones
up the nervous system and makes new
blood. Complete treatment, two
medicines, one price, 25c.

BROWN MFG. CO., New York.

For sale by all druggists in Hop-
kinsville.

CRUSHED THE SNEERER.

An American Teacher Who Was Very Patriotic

An Italian gentleman whom I met at the hotel said he deserved most de-
praved inappreciation of the wonderful
wasteness of the United States, says a
writer in Scribner's.

He spoke English very well, for he
had been many years in London, and we
were in the same hotel. After dinner, after
dinner, Pisa and Van Rogen, he asked
politely whether I was not an Ameri-
can from "the states." On learning
that I was he begged me to tell him
something of our government.

"You are a president of the country,
the whole states, is it not?" he inquired
earnestly.

I nodded assent.

"Va bene! If a man kills—murders,
you understand—who tries him, the
federal or state courts?"

"I am," I replied, "unless
it is a case of treason."

"If he is convicted, who can pardon
him—the president, of course?" he
asked, with calm assurance, and a slight
emphasis on the "of course."

"No, indeed; the murderer is tried in
the state, condemned by the jury, and
then, if he is not pardoned, if he is, or by the state's chief
the governor. The president
is not allowed to do with it."

"I dashed my companion, sar-
rificing—in Italy the governor of a
large province has not the par-
doning power."

"Sir, I thundered, now thoroughly
angry, Italy will go twice into the
party service of Texas."

"It was very likely to get angry,
and especially with such a scurvy
little Italian. I know it. But
who could sit still and hear the sheer,
unapproachable—nay, glorious—im-
mensity of our country assailed without
getting angry. No one except the
assiduous reader of the *New York Times*,
and with a brass assertion that
he was, after all, not such a virtuous

Voluminous.

A Philadelphia lawyer said a very
long speech on the day. He was
seated with a group of friends, and
they were discussing in a desultory
way the leading topics of the day. One
of the parties present, Mr. —, per-
sist in monopolizing, more than his
share of the conversation, and his views
did not at all suit with those of the
other lawyer:

—knows a good deal, doesn't

repel the lawyer; "he knows
too much for one man; he
be incorporated." —Green Bag,
so talcing, the man said,
she had her a
so talting, she shook her head.
liked for half a day.

VIRUS IN GLASS BULBS.

New Method of Vaccination Principles in Chicago.

Health Officers Introduce a Process That Does Away with "Points" How the Tests Are Made and the Pre-vaccines Applied.

Chicago is in the eyes of the medical
world just now; for that city is giving
scientific and popular knowledge of
vaccination to the medical department of
research and observation.

Before the days of Assistant Health
Commissioner Frank W. Reilly, and of
Chief Medical Inspector E. Garrett, of the
Chicago department, an idea pre-
valled that vaccination was a
matter of "points" and "lines," and
anywhere, anywhere and with any kind
of anyone or human vaccine virus. All
this is changed now, states the Chicago
Record.

The theory of Drs. Garrett and Reilly
is that vaccination is important enough
to engage the attention and enlist the
help of the ablest practitioners.
They cry out against the idea that any
body can inoculate a patient as well as
the physician.

At the present time the medical
heads of the health department are making
extensive studies of the subject
and are compiling statistics which
they expect will become authoritative
throughout the world in the matter of
smallpox prevention.

Even the method of inoculation used
by the department is subjected to tests
as severe as can be devised. First,
samples are sent to Dr. Gehman, the
chemist and bacteriologist of the de-
partment, and then the results are
left to say, see how many kinds
of germs can raise from the sample of
virus. Then he puts the bacilli under
his microscope to see whether any of them
are the agents of erysipelas, of
furunculosis or of septic diseases—
blood poisoning, etc. If he finds the virus
to be free from these dangerous germs he sends back a re-
port "O. K." Dr. Garrett then takes
samples of the same lot and vaccinates
a dozen persons needing smallpox protection.
If the virus "takes" in a ma-
jority of the cases and if the sores pro-
duced are "typical" without improper
symptoms, such as mastery discharges

antiseptic solution, also cleanse the arm
to be treated, also cleanse his pocket
knives, and the like. Then he makes a single scratch on the arm—
not enough to draw blood—and inserting
into one of the unsealed vaccine points
into a Pasteur rubber bulb syringe he
draws a virus into the tube on the
arm. In a few days it "works," and
the patient is proof against smallpox
for several years.

The new operation is absolutely cer-
tain, when the antiseptic is applied to
the wound, blood-poisoning is im-
possible and evil effects never are ob-
served after it. The old argument that
vaccination might implant tuberculosis
germs is exploded, for with the pre-
liminary tests such microbes are not
present in the virus.

COTTON STATES FAIR.

The Great Southern Exposition Opened in Grand Style.

Buildings of Great Size and Excellent Arrangement—What the Nations of Europe and America Are Displaying.

Special Atlanta (Ga.) Letter.

The opening of the Cotton States and International exposition at Atlanta, Ga., September 18, marked a new epoch in the relations between the north and south. The south has followed so closely upon the opening of the Chickamauga-Chattanooga national park and the great Grand Army encampment at Louisville that they may be said to have cemented the bond of brotherhood entered into by the boys in blue and the boys in grey in profitable and entertaining reunions.

The month of September, 1892, will live in American history forever, because it witnessed the end of sectionalism and the beginning of the end of the Civil War in the south.

Judge Emory Soper, of the United States court at Macon, Ga., delivered a dedicatory speech at Atlanta which was as full of national sentiment as was Henry Watterson's magnificent prose poem, which is still the talk of both sections of the country. And Prof. Booker T. Washington, most famous of negro educators, astounded his thousands of hearers by pointing out the progress made by his race in every line of legitimate industry. The professor's words had statements by figures to back them up, and showed that harmonious cooperation than that the blacks not a whit more than the whites.

The wheels of the exposition were set in motion by President Cleveland, who, after a brief interview, attached to a wire connecting his Bayard's Bay retreat with the motor in machinery hall at Atlanta. This act of the nation's chief magistrate closed the elaborate opening programme, and the people of the south, assisted by a large delegation from the north, took possession of the exposition grounds whose beauty has been commented upon time and again in these columns.

The Cotton States fair, although not yet complete, will be the greatest exposition ever held in the United States, excepting only the Chicago fair. In some respects the Centennial exposition at Philadelphia was superior to this

CENTRAL SECTION OF BAS-RELIEF OF TERRA-COTTA ON MACHINERY BUILDING.

southern enterprise, but in others it was decidedly inferior. Foreign exhibitors have taken a lively interest in the Atlanta fair, probably because it promises to open a new market for their manufacturers.

Mexico makes a complete exhibit of her resources, and a picturesque Mexican village has been built on the grounds. Guatemala has also put a village, at about a fine reproduction of its capital, in the exposition. Venezuela and Colombia also till space, Cuba has a fine exhibit of tobacco and other products of the island.

The European exhibits comprise these: British, French, Irish pottery, electro plate and silverware, cut crystal, Sheffield cutlery, Birmingham goods, Bradford wools and cloth, Coventry cycles, pianos, furniture, chemical products, terra cotta statuary, ship models and railway appliances, besides.

France—Tapestries, rich drawing-room furniture, bronzes, lamps, statuary, upholstery, scientific and electrical appliances, marine and mathematical instruments. Parisian novelties, jewelry and fancy ornaments, embroidery, part of the Pasteur Institute, for the discovery and treatment of bacteriæ and bacilli, perfumery, soap, wines and liquors.

Germany—Plates, artistic majolica, Dresden china and glassware, cut stones, new photo publications and scientific apparatus, maps and ceramics. Neapolitan corals and tortoise shell ornaments, Roman cameos, artistic and high-class jewelery, tapestries, cloth and cotton fabrics, hats, bicycles and sewing machines, chemical and pharmaceutical products, scholastic and scientific apparatus, and publications, and a great variety of exhibits in olive oil, wines and liquors.

Belgium—Brussels lace, embroideries, patent hand stitching machines, operative exhibits of glassmaking, fancy goods, and similar articles.

Russia—A very important collection of Russian furs, from one of the largest manufacturers of St. Petersburg; also a splendid collection of stuffed bears, seals and other animals, Russian silverware, and other articles, carved wood and art fabrics, etc.

The various exposition buildings are nearing completion rapidly, but they are even now worth visiting. Besides the United States government building

the following structures are open to the public: Manufactures and Liberal Arts, 218x370 feet; Machinery, 100x200 feet; Minerals and Forestry, 80x200 feet; Agriculture, 150x300 feet; Transportation, 150x118 feet; Arts Building, 100x120 feet; Negro building, 100x300 feet. The buildings are imposing, substantial and roomy, the designs being mostly Romanesque. The Mineral and Forestry building is a handsome example of architecture to be found in the south. The Horticultural building is especially designed to make a complete exhibit of the flora of the south. Not the least interesting feature of the exposition is the negro exhibit, which shows the best work of the negro race in every department of

WORK OF THE MISSISSIPPI.

Every year the Father of Waters carries down a square mile of land. The Mississippi has in the course of ages washed away a vast amount of soil and high land within its drainage area sufficient material to make 42,000 square miles of new land! by filling up an estuary which extended from its original outlet to the Gulf of Mexico for a distance of 500 miles, and which with from 30 to 40 miles. This river says Longman's Magazine, is still pouring solid matter into the gulf, where it is spread out in a fan-like shape over a coast line of 150 miles, and is filling up the marshes 100,000 acres a year, or six times as much soil as was contained in the construction of the Manchester canal, and sufficient to make a square mile of new land, allowing for it having to fill up the gulf to a depth of 80 yards.

One of the vagaries of this operation may be conceived when the fact is considered that some of this soil can be transported more than 3,000 miles and that if the whole of it had to be carried on boats at the lowest rate of freight, the cost of removal would be 10 cents a ton per mile, or, say, for one-ton of a penny per ton per mile, over an average of half the total distance, the cost would be no less a sum than \$235,000,000 a year. Through the vast delta the force of the river winds and turns, and carries away immen-surable loads until it extends its length to nearly 1,900 miles, or more than double the point-to-point length of the delta, continually eroding the banks in one place and building up land in another, creating a narrow neck which lies between the two extremes and filling up the old channel.

PEN AND INK DRAWING.

Modern Imitation of the Ancients by a New Process.

It is easy, of course, to understand how pen drawing should have come to be so largely employed and elaborated, in view of its evolution and application. Air etching will not print with type, nor with a steel engraving. This, says the London Spectator, led in the early part of the century to the imitation of steel engravings by wood engravers, who did the business most skillfully with the steel tools. The drawings for them were mostly made in pencil. But photographic process rendered the intervention of the wood engraver needless, if the artist made a pen drawing that would photograph and print. The technical difficulties can easily be traced or drawn over the pencil line, very much like the engraver's tool.

The point about the ancients and about their remains lies in the imitation by the moderns in a new medium of the technique of an old. It is certain that the ancients could have performed this feat if they had chosen, not altogether certain that they would have chosen. For to consider those other points of reproduction and dissemination, the modern master seems to be in no greater hurry than the ancient to make use of the new facilities.

When such a master does take up the pen, he handles it to much greater effect than do the devotees.

BOY AND ROBIN.

Friendship of the Two Brothers About by Gold Weather.

During the extremely severe weather of February, 1892, myriads of birds perished from cold and starvation, both in Europe and the United States. In England this was due to the fact that the weather was unusually severe, perhaps, as in the country where the birds winter is more thickly settled than with us, and there were more to see their sufferings. But occasionally the British birds found friendly shelter.

The London Times published, during the cold weather, this note from Randolph Walther, a boy of twelve years, who lives at Tunbridge Wells:

"I thought perhaps you would allow a schoolboy to tell you how very tame and fearless the cold and hunger have made me."

"Of course we feed them with bread and all sorts of odds and ends, and the ground is simply black with our hungry visitors. Even the suspicious rooks come quite close to the house for their share."

"Little blue tit passes its day in our basement, heedless of the cold, busily pecking at the crumbs I leave for it."

"Most of all I wish to tell you about my strange bedroom companion, a little robin, which has taken up its residence in the eaves of the kitchen roof. He never leaves the window open, he never goes out except to take a short fly. We pass the night together, and he makes his bed in one of my footballs."

"The other morning he woke me up by singing on a chair at the side of my bed. I suppose he thought I ought to be at my lessons."

Not a Good Luck.

It is not always easy to recognize the "gentleman" in the Evangelist, the "old man" in the old lady in the following story, taken from the Evangelist, was somewhat in doubt: In the "memorial room" of Trinity church is a large marble tablet put up in memory of the late Bishop Hobart. It is a bas-relief, representing the bishop kneeling and sinking into the arms of an angelic female figure, probably intended for the angel of death. Years ago an aged couple from the country were shown about the church, and when they reached the tablet, the old man said before the old lady spoke: "That's a good likeness of the bishop," she said, "but—" here she regarded the angels personage attentively—"it's a poor one of Mrs. Hobart. I knew her well, and she didn't look like that!"

Round Oak Stove

Now is the time to buy heating stoves. The Round Oak is still in the lead. It is the only air tight stove on the market. The genuine ROUND OAK found only at Forbes & Bro. It heats more on less fuel than any stove made and will out last a half dozen of the cheap imitations,

Majestic Range.

We sold more majestic ranges last year than were ever sold before in the same time, and the reason they sell is because they are the best and most economical baker's made. The oven is the most important part of a cooking apparatus, the fire box is the digestive organ and the draft the circulation. These organs in the Majestic are different from any stove or range made. The Majestic oven is the most sensitive, the fire box the most economical and the draft the simplest and most perfect.

In Buggies

we have this year far surpassed any previous record. Our stock was more carefully selected and was bought cheaper. Come and

well bought are already half sold. Come and

JOIN IN THE PROCESSION.

We have a very full line of HARNESS, SADDLERY and FLY NETS. TALBOT SADDLES made to order.

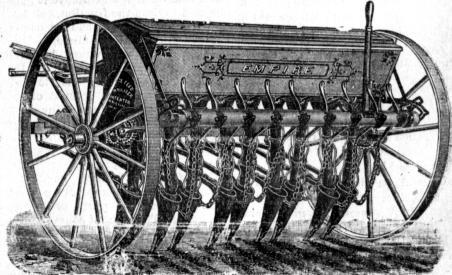

EMPIRE Wheat Drill.

Our Empire wheat drill still leads. They cannot down her.

Why?

Because she is the only force feed on the market. The Empire feed is the only one a farmer can rely on, and they know it.

So we sell more and more as the farmer finds out what is best.

Fertilizer.

We have sold over half a million pounds of Armour, Northwestern, Homestead and National Bone Meal, and want more, so come in quick before all is gone.

Harness.

We have secured Mr. John S. Shalley in our Harness department, which he has improved in every point, and we have the most complete stock ever carried in in the city.

TALBOT SADDLES Made to Order.

Tom Pettit in an interview published in the Louisville Post, jumps on Hardin and ridicules the idea that he should withdraw in favor of the Democratic candidate. He goes further and declares that a change could come in the management of the state, saying "It is honey combed with extravagance and mismanagement and any change would better the condition." This utterance of the Populist candidate ought to convince even the most skeptical that Hardin's candidacy is entirely in the interest of Bradley. He has been frequently caught hobnobbing with James in Louisville and his candidacy is intended to take votes from Hardin and thereby make Bradley's election possible. If any Democrat or other good citizen is intending to vote for Pettit, he may face the issue squarely and decide whether he is Hardin to Bradley. If he is satisfied Democrat, then a vote for Hardin is the duty that confronts him. He wants to prevent Kentucky passing into the hands of a controlled by negroes and allies. Pettit has thrown off the mask. He is doing all he can to aid and defeat Hardin.

Boyd's life has come to a end and he will be remembered as a awful example of the curse of vice. The son of an illus sive, naturally bright, well educated, capable lawyer, a fluent speaker and a polished orator, he Hardin to take a place among the best men of his state, but he away all hope of success in life and became a slave to an appetites that dragged him from the sofa and consigned him to a drunkard's grave.

There will be no lack of oratory this in the First district. Con man Hendrick, Charlie Wheeler, ame, Judge Robbins, Capt. and Mr. H. D. Moorman, all at long lists of appointments for the ticket. The "Old-tar" proposes to give Hardin majority this time. The boys in their fighting clothes.

Nelson A. Miles will succeed no. M. Schofield as command general of the army. Gen. Schofield the age of 61 last week was retired. Gen. Miles will be at head of the army since Gen. who was not a West Pointer.

P. Walton, Arthur Ford, P. t. bald, Polk Johnson, Ed Leigh, Keller and John Barry were the absenteers whom every nized, at the press meeting

Taylor, for senator, and W. per, for representative, both ve and Blackburn, were nom in Henderson Saturday.

The Leader's Opening On. Fall opening of millinery at leader," Mme. Fleurette Levy, er, is now on and will come through-out to-morrow. A large of ladies visited the handmester yesterday and Mrs. Levy's will be packed to-day. On to a large crowd will also be d to look through the Leader's stock of millinery and make selection. The millinery busi ness is assisted this season by E. Rodgers, well and favorably to the trade, and Miss Kennedy and Ida Allen, who are all versed in the business.

Double strength, for sale by

MILLIONS IN WHEELS.

Bicycling Is Much More Than a Passing Fad.

Estimates on the Amount of Money Employed in Their Manufacture in This Country—Great Army of Workmen.

People who call bicycling a passing fad have probably never stopped to consider what an enormous amount of capital is employed in the business of making wheels in this country, and probably have no idea of the number of people dependent upon the business for their livelihood. The figures are astonishing. There are in the country to-day about 130 good-sized bicycle manufacturers. If all the smaller concerns were counted in, concerns that turn out from 50 to 200 bicycles a year, the number would be swelled to about 300. The number of bicycles these 300 factories will produce this year will not be less than 500,000. At an average cost of \$75 each to the buyer this means that \$37,500,000 will be spent in this country this year for bicycles, providing, of course, the entire product is sold. But there is little doubt of that. Go to a bicycle store and try to buy a high-grade wheel. They will take your order and tell you they will deliver the wheel in a couple of weeks. More good wheels have been sold this season than have been made, and it is doubtful if more than the manufacturers can catch up before snow flies.

But the \$37,500,000 do not cover the entire expenditure in the bicyclic way of the people of the country. There are costumes, bicycles, and such—lamps, cyclometers, patent mudguards, and patent this—that-and-the-other kind of apparatus that will swell the sum to \$50,000,000.

Where does all this vast sum of money go? Well, in the first place, some of the manufacturers who, a few years ago, were poor men, are now immensely wealthy. But there can be nothing unusual or particularly undesirable in that; they built up the business from nothing and have furnished the public with one of the greatest sources of enjoyment ever known. Some of the rest of the money, after the manufacturers have had their bits, goes for material and the balance to the army of working men, women, boys and girls, whose labor turns the raw steel, rubber, wood and leather into the finished product.

How many are in that army? The number can only be estimated. In a Chicago factory that turns out 30,000 bicycles a year, 800 people, mostly full-grown men, are employed. That would be an average of 37,500 bicycles to each employee. If there are 500,000 machines to be made and each employee makes thirty-seven and one-half machines, there would have to be, therefore, 13,333 employees. But as there can't very well be a third of an employee it may be well to drop the fraction, call the number even 13,333, and let one of them work a little overtime.

That estimate, however, includes only the people employed in the actual or exclusively bicycle factories. It takes no account of the workmen employed in machine shops making bicycle "parts" which are sent to the bicycle factories and handled by the employees there only as "parts."

The Chicago factories mentioned above does not manufacture more than one-half the parts of its own machine. That fact of course makes it necessary to double the 13,333 to find the number of people in the bicycle army, which gives 26,668, and still not including the country agents and their salesmen and helpers, who surely swell the total to 30,000. Next year enough more money will be invested, factories started, people employed and wheels made to increase by half all the estimates above given.

A party of Lexington (Ky.) picketers, who went to high bridge recently, found in the woods near there what they thought was an empty box. An out, white-haired man told them that the body of his wife was in the box. The man, who Dr. T. J. Frye, said that his wife died in Virginia two years ago; that on her death she requested him to bring her body back to her place of nativity for burial. Being so poor that he was unable to keep his promise when she died he placed her body in a pine box, which he had coated on the inside with beeswax. He kept it until a few weeks ago when he brought it to Kentucky.

HOME STUDY.

We have prepared

books on Bookkeeping, set to "HOME STUDY." Write for Home circulars at once.

A new and highly illustrated magazine for young people has just been started by Frank Leslie's Publishing House. It is called Frank Leslie's Pleasant Hours for Boys and Girls, and is in every way equal to the best publications of its kind, although the price is but 10 cents. The first number (October) contains the following articles: Stories for boys by Edward S. Ellis, and one for girls by Jeannette H. Wa worth. The editor of the new magazine is Frank Lee Farnell, who has been connected with Frank Leslie's Publishing House for a number of years, and who thoroughly understands what will please and interest the young people.

DEAFNESS CANNOT BE CURED by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed you have no hearing at all. The cure of the disease can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the nose.

We will give \$100 for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

MATRIMONIAL.

PETITE MEE. Shipton Pettit and Miss Elizabeth Meek escaped from Princeton, Ky., and were married in Jeffersonville Sunday afternoon. An hour before Capt. Cisco received a telegram from the father of the girl to arrest them, as the boy was but 17 and the girl but 16.

Mr. Alex. S. Cox and Miss Bettie Bowls will be married at the Christian church on the evening of October 17th. Both are well known and popular in social circles and their wedding is one that has been expected for some time. There will be several couples of attendants and the affair will be quite brilliant.

BLACKBURN LANE.—Miss Lucille Blackburn, daughter of Senator J. S. Blackburn, was wedded at St. Matthews Church on Saturday evening at the home of the bride's mother, Mrs. W. C. Owings, in Louisville Tuesday afternoon at 3 o'clock. Dr. J. V. Molloff, Dr. Frank Pashley and Dr. C. C. Coffey officiated in a most happy manner. The marriage was a very quiet one, and a few friends and relatives being present. Mr. Harris is connected closely with the Louisville Post, and is a very popular member of the press.

AROUND AND ABOUT.

NOTHING BUT NEWS FOUND IN THIS COLUMN.

A Condensed Account of the Latest Happenings Tidily Told for Busy Readers.

Kit Barney dropped dead in his coal mines near Sturgis.

A \$1,000 bluff bet that Bradley would win was quickly called by two Louisville Democrats.

The annual convention of the National Pythian Press Association is in session at St. Louis.

By the will of a former fiance, Mrs. M. E. Patterson, a milliner of Louisville, falls heir to \$50,000.

South Carolina's Constitutional Convention adopted a section forbidding the granting of divorces for any cause whatever.

Judge Settle, of Bowling Green, renders a decision that fire insurance companies must pay policies in full, instead of only three-fourths of the value of the property destroyed.

Bertie Bray, a young girl living a few miles from Glasgow, was burned to death. Her clothing caught fire from an open grate and she rushed out into open air.

South Christian.

OAK GROVE, Oct. 12.—As your correspondent has sadly realized that something must be done on this cold night to keep up circulation of the blood to prevent a state of perfect numbness, he concluded to write an epistle to your paper, having decided that it was cheaper than coal when the shed was entirely deprived of that article.

Jack Frost made his first appearance in our parts last night.

A protracted meeting of the progress at Slaton near here, conducted by the pastor, Rev. J. L. Cheek, an able divine. He is treating his congregation to some very fine sermons and it is hoped much good will be accomplished. Large crowds attend regularly.

We are going to chronicle the illness of our dear christian neighbor, Mrs. T. A. Williams. She has been quite sick for some time and doesn't seem to be improving.

Among the others who are and have been sick recently are Mrs. W. A. McKenzie, Miss Elizabeth Garrett, Master Ashton and little Mary Morrison, L. A. Tuggee and Mrs. Tom Baynard's children.

The tobacco crop is about all cut and housed and corn cutting is the order of the day.

We are very much in need of rain!

Mrs. D. A. Harrison and Miss Mae King, of Clarksville, visited Mrs. W. A. McKenzie last Sunday.

Mr. Ed. Munford and Miss Mary Brumley, of Clarksville, visited the family of Mr. E. H. Garrett, Slaton, 29.

Mr. Rob. Garrett, who is attending school at Guthrie, visited his parents last week.

Mr. W. L. Caudle, of Howell, was among his friends here Sunday.

Miss Ann Sallee is visiting relatives near here this week.

Mr. and Mrs. A. A. Word has returned from Adam's Station, Tenn.

It is rumored that a wedding will occur near here ere many more of these beautiful autumn days are numbered with the past. We will withhold the name at present.

Mrs. F. A. Woottor and son Ed., will leave soon for Texas, where they hope Ed.'s health will be perfectly restored.

Uso.

Song of Willie Bradley.

Have you ever heard the story
Of the man named Willie Br.
Who was worshipped by the members
Of the high G. O. P.?
How did the young gentlemen
Of a time not far away
They could sweep the greatest distinction
Between the whites and them away.

CHORUS.

My poor deluded friends
Hear me now, I pray,
He has always been the same to-day.

Surely you have heard of Willie
Got up to speak in Eminence,
Just to let him ride one rail,
Of the Grand Old Party's fence,
But the old stockade fence
Just outside the fair-ground gate,
And the Plumed Knight left the platform,
Thus ended the joint debate.

CHORUS.

Wat Hardin made the chase too hot
Bill sought some means to fly
The track that they may never
Wound him to, though he die,
O guard your valiant (?) champion,
Your brave little baby Bill,
Tell him to be good and try to be cured
By swallowing the silver pill.

CHORUS.

PROCEEDINGS.

Continued from first page.

from the reader to begin. Many of the words in the spelling book are rarely used. Combine written and oral spelling all through. In oral spelling the pupil gets drill in articulation and pronunciation. In written spelling we practice it as in after life. An exercise in penmanship if properly conducted.

After intermission Prof. Ayres took up the subject of reading. This important branch much neglected.

Good oral reading is conveying to the listener the ideas of the writer.

Object of silent reading to gather thought. In order to read well it is necessary to read thoroughly the lesson. I myself have read a page a dozen times to get the full expression. How necessary then for the pupil to make an exhaustive study of the selection. Make haste slowly in this matter, cultivate an easy natural position in the class. That will not be easy or the mind can not be free.

Prof. McCartney: We find pupils in first, second and third readers reading beautifully, afterwards they seem to retrograde, reading in a dull, lifeless manner. Why is this? How shall we secure expressive reading in advanced work?

Prof. Bartholomew: In answer to the last question who would say failure on part of the teacher would do his work properly. The remedy naturally suggests itself.

Prof. Coyner: Is the word the unit of thought.

Prof. Bartholomew: No, it is evidently the sentence.

Prof. Lindsay: In obedience to a father's command we have to go over the ground too rapidly. This necessity makes bad reading.

Prof. Hopson: The failure to read well in advanced classes due to faulty training in the primary work.

Prof. McCartney found his boys in advanced reading cultivated the habit of stoicism. This might be overcome if the teacher were enthusiastic.

Prof. Bartholomew: In answer to the last question who would do his work properly.

Prof. Coyner: Is the word the unit of thought.

Prof. Bartholomew: No, it is evidently the sentence.

Prof. Lindsay: In obedience to a father's command we have to go over the ground too rapidly. This necessity makes bad reading.

Prof. Hopson: The failure to read well in advanced classes due to faulty training in the primary work.

Prof. McCartney found his boys in advanced reading cultivated the habit of stoicism. This might be overcome if the teacher were enthusiastic.

Prof. Bartholomew: In answer to the last question who would do his work properly.

Prof. Coyner: Is the word the unit of thought.

Prof. Bartholomew: No, it is evidently the sentence.

Prof. Lindsay: In obedience to a father's command we have to go over the ground too rapidly. This necessity makes bad reading.

Prof. Hopson: The failure to read well in advanced classes due to faulty training in the primary work.

Prof. McCartney found his boys in advanced reading cultivated the habit of stoicism. This might be overcome if the teacher were enthusiastic.

Dr. Kollock in Nashville.

Regular Graduate and Registered Physician. Formerly Assistant Surgeon U. S. Navy, afterwards Post Surgeon U. S. Army, and later Surgeon British Marine Service, with two years' service in the Crimean War. Now Practicing Physician at the "Emergency Clinic," Ark. Endorsed by the "Emergency Clinic," Vol. X, page 155, "the largest and most important work in the world," being in every way equal to the size of a large church Bible. He is noted as one of the active principle of galenism, especially for tonics of the face and womb. Curative Syphilis, Lost Manhood and General Delirium. The Doctor has been all over the world, and made many cures, and up to date by other physicians. Vendome Building.

Gov. Morrill of Kansas continues seriously ill.

A SOUND LIVER MAKES A WELL MAN.

Are you bilious, constipated or troubled with jaundice, sick headache, bad taste in mouth, foul breath, coated tongue, dyspepsia, indigestion, hot dry skin, pain in back and between the shoulders, chills and fever, etc?—Your liver is out of order, and your blood is slowly being poisoned, because your blood does not act properly.

Liver will cure any disorder of the liver, stomach or bowels. It has no equal as a liver medicine. Price 75 cents. Free trial bottles at R. C. Hardwick's drug store.

George W. N. Yost, typewriter inventor, is dead.

FOUND

At C. K. Wyly's drug store, a manervous cure for all kidney complaints, nervous exhaustion and female weakness. It is the Clinic Kidney Cure.

The debt of France is estimated now at \$7,000,000,000.

In a recent letter to the manufacturers Mr. W. F. Benjamin, editor of the Spectator, Rushford, N. Y., says:

"It may be a pleasure to you to know that the right hand which Chamberlain's medicines are held by the people of your own state, where they must be best known. An aunt of mine who resides at Dexter Iowa, was about to visit me a few years since, and before leaving home wrote me, asking if they were sold here, stating that she had a son who did not like to be without them." The medicines referred to are Chamberlain's Cough Remedy, famous for its cures of colds and cough; Chamberlain's Pain Balm for rheumatism, lame back, pains in the side and chest, and Chamberlain's Cold Cholera and Diarrhoea Remedy from bowel complaints. These medicines have been in constant use in Iowa for almost a quarter of a century. The people have learned that they are articles of great worth and merit, and unequalled by any other. They are for sale here by R. C. Hardwick, Druggist.

Four business houses were destroyed by fire at Kenoma, Mo.

Several years ago I was taken with a severe attack of flux. I was sick in bed ten days and could get nothing to relieve me until I used Chamberlain's Cold Cholera and Diarrhoea Remedy from bowel complaints. These medicines have been in constant use in Iowa for almost a quarter of a century. The people have learned that they are articles of great worth and merit, and unequalled by any other. They are for sale here by R. C. Hardwick, Druggist.

Texas legislators are assembling in Austin for the special session.

TRUTH TELLED TO D.

"Foley's Honey and Tar" is one of the standard medicines used in the Working Women's Home Association, at 21 South Peoria street, Chicago."

DR. BLINN, MED. SUP'T.

"Foley's Honey and Tar gives the best satisfaction here."

C. F. BICKERS, Roseland, Ill.

"My customers call for Foley's Honey and Tar when wanting a good cough syrup."

J. H. KUSTE, EASTON, O.

For sale by C. K. Wyly.

Ben Shurley's broomcorn barn and stable were burned near Charleston,

Kentucky.

Comptometer's Eye and Skin Ointment

Is unequalled for Eczema, Tetter, Sal-Blenn, Scall Head, Sores, Nipples, Chapped Hands, Itching Fingers, Burns, Frost Bites, Chronic Sores and Granulated Eye. Lids. For sale by druggists at 25 cents per box.

TO HORSE OWNERS.

For putting a horse in fine healthy condition try Dr. C. H. Ballou's Remedy. They now sell it in ointment, salve, salivation, ear oil, soap, and digestion, cure loss of appetite, relieve constipation, correct kidney disorders and destroy worms, giving new life to old and over-worked horses. 25 cents per package. For sale by druggists.

Great Falls, Mont., suffered a severe loss from fire on Sept. 27.

When Baby was sick, we gave her Castor Oil. When she was a child, she cried for Castor Oil. When she became Miss, she clung to Castor Oil. When she had Children, she gave them Castor Oil.

DELICATE WOMEN

should Use

BRADFIELD'S

FEMALE

REGULATOR.

IT IS A SUPERB TONIC and exerts a wonderful influence in strengthening her system by driving through the proper channels all impurities. Health and strength are guaranteed to result from its use.

My wife was bedridden for eighteen months, unable to walk, and was considered a废人 (a person who can do nothing). I paid Bradfield's Regulator for two months, and regained my health.

J. M. Johnson, Malvern, Ark.

BRADFIELD'S REGULATOR CO., ATLANTA, GA.

Sold by all Druggists at \$1.00 per bottle.

TYPE RECOGNIZED BY PHYSICIANS.

As a rule I am opposed to proprietary medicines. Still when such is the case, and when such is the case, I have found Chambers' Pain Balm the best remedy I have ever used for neuralgia of any kind. I have conscientiously recommended it to many persons.

WILLIAM HORNE, M. D., Janesville, Wis. Sold by R. C. Hardwick, Druggist.

Parts of Cass county, Ill., are suffering from an epidemic of hog cholera.

BALLARD'S SNOW LINIMENT.

Mrs. Hamilton, Cambridge, Ills., says: "I had the rheumatism so bad I could not raise my hand to my head, and I could not stand upright. I was entirely cured me. I take pleasure in informing my neighbors and friends what it has done for me." Mrs. L. C. Handley, clerk for Lay & Lyman, Kewanee, Ills., advises Snow Liniment given him of rheumatism. Why not try it? It will surely do you good. It cures all inflammation, rheumatism, sores, cuts, sprains, etc. Free trial bottle at R. C. Hardwick's drug store.

Three bandits held up four negroes near East St. Louis, Ill., and shot two of them.

THE STOLEN IS CHEAPEST.

Foley's Saraparilla is from three to ten times stronger in blood cleansing qualities than any other proprietary medicine. Trial size, 50¢. For sale by C. K. Wyly.

Mrs. Nellie W. Hagel was killed while doing a parachute drop at Monrovia, Cal.

Tired women need to have their blood purified and enriched by Hood's Saraparilla. It will give them strength and health.

The French government will inter the remains of Prof. Louis Pasteur with state honors.

BALLARD'S HORSEHOUND SYRUP.

We guarantee this to be the best Cough Syrup manufactured in the wide wide world. This is saying a great deal, but it is true. For consumption, coughs, colds, sore throat, sore chest, pneumonia, bronchitis, asthma, croup, coughing, cold, and diarrhea, it is unequalled. It is positively guaranteed.

Mr. Ballard's Horsehound Syrup is to be without an equal on the whole face of the globe.

In support of this statement we refer to every individual who has ever used it, and to every druggist who has ever sold it. Such evidence is indisputable. Free trial bottle at R. C. Hardwick's drug store.

The anti-Semitic victory at the polls in Vienna has stirred up the whole Austrian empire.

From all accounts Chamberlain's Cough Remedy is a Godsend to the afflicted. There is no advertisement about this; we feel just like saying it.

The Democrat, Carrollton, Ky., for sale by R. C. Hardwick, Druggist.

The grand jury at Bloomington, Ill., has reported that city officials are derelict in their duty.

NOTICE.

I WANT every man and woman in the United States interested in the Opium and Whisky Business to send me their names and addresses. Address B. W. Wooley, Atlanta, Ga. Box 252, and one will be sent you free.

"You told me" said the weary collector, "to bring this bill the first."

"Yes," replied the editor, "but I meant the first time I had any money."

—Atlanta Const.

Bassett & Co.

DEATHS.

TAYEY.—Mr. Wm. Tayey, father of Mrs. T. S. McCall, died Monday at his home in Woodstock, Canada. Dr. and Mrs. McCall left at once for Canada to attend the funeral.

COLORED.

ROY.—Rob Roy, aged 61 years, died of grip in the city Tuesday.

FRENS.—A child of Jim Perkins died in the city Tuesday of fever.

MCNAUL.—Minerva McNaul, died Tuesday of consumption at her home near Church Hill, aged about 50 years.

The first annual session of the Bowling Green Chautauqua will be held on the beautiful fair grounds in that city, commencing Sunday, Oct. 13th, with the grandest literary programme ever given in Southern Kentucky. The managers have spent thousands of dollars to make this the grandest event that has ever occurred in the city, and the efforts of our citizens are arranging to be present. The programme opens with that well-known and eloquent evangelist and orator, Sam W. Small, who will preach or lecture every day during the entire session.

KNOWLEDGE

Brings comfort and improvement tends to personal enjoyment when rightly used. The many, who live well, and enjoy life more, will less expenditure by more promptly adapting the world's best products to their wants. The pure liquid laxative principles embraced in the remedy, Syrup of Figs

Its excellence is due to its presenting the form most acceptable to the taste, and the most nutritious and therapeutic properties of a perfect laxative, effectively cleansing the system, expelling colds, headaches and fevers, permanently curing constipation, giving a sense of health and strength, and removing all the symptoms of disease, because it acts on the Kidneys and Bowels without wetting them and it is perfectly free from irritation.

Syrup of Figs is made by all drug stores and S. L. bottles, but it is manufactured by the California Fig Syndicate, whose name is printed on every bottle, also the name, Syrup of Figs, being well informed, you will find any schoolbook it offered.

HERE AND THERE.

Mrs. Bailey and Miss Eppinghouse gave a musical concert at the Tabernacle last night.

Dr. E. N. Fruitt, Dentist, office over City Bank, Hopkinsville, Ky.

The Social of the Baptist Church will meet with Mrs. S. G. Buckner this afternoon at 4 o'clock.

FOR RENT.—A very desirable dwelling on South Virginia street, 8 rooms, large shady yard. W. W. Ware.

Born, to the wife of E. W. Bracken, a fine girl, Wednesday afternoon.

The celebrated Diamond coal is sold by H. M. Dalton, cor. 13th and R. R. sts. Phone 112, oct. 8t.

The cadets of South Kentucky College have donned their handsome new gray uniforms.

Dr. A. P. Campbell has resumed his practice and also has secured the right to exercise teeth by the plainest processes. Office over Bassett & Co.*

Mrs. Fannie Rogers will still remain in charge of the Millinery department at Richards & Co.'s and is assisted by Mrs. Ben Rawlins. This branch of their business will be more than ever a leading feature this season.

Men and women desiring pleasant, paying employment can get it by addressing G. D. Free, Clarksville, Tenn.

Mr. Lem Cato, living on the Broach farm, near Edwards' Mill, is the king sweet potato raiser of the season, so far as heard from. He raised in one city one of the Red Necksand varieties which weighed five pounds, and a number of others that tipped the scales at from four to four and a half pounds.

Fine woolens for suitings at Four-right's, the tailor. Cleaning and repairing a specialty. Bridgestreet, * fri t.

Clarksville has been playing miserable ball of late, says the Times. In the Knoxville series they failed to get a game out of the three played. Their "crack-a-jacks" it seems, have not distinguished themselves to any great degree while on their southern tour.

After 16 years of uninterrupted success the Hopkinsville Building & Loan Association will offer a safe and profitable investment as well as an easy mode of acquiring homes. Shares will be on sale Oct. 1st, at office of the treasurer. Thos. W. Long.

Five gauges and eight store-bags are all that are now assigned places in the October revenue assignment. The storekeepers were not re-assigned. In the list of 13 shifted around there are found no Christian county men.

The books for subscription to stock in the Hopkinsville Building & Loan Association, will be open to the members of the First National Bank, Oct. 1. A limited number of shares will be sold.

J. D. RUSSELL, THOS. W. LONG, PREST.

The government is industriously working up evidence in the Bannock Indian outrage cases.

FOUND.—Bunch of two keys. Call

The sale of lots in the Hopper property in the southern suburbs was a success. Tuesday. Twenty-two lots were sold to W. T. Tandy, J. E. McPherson, Geo. C. Long, W. J. Witters, F. W. Dabney, L. L. Buckner, D. A. Ferry, J. M. Breathitt and H. W. Bentworth, the sales aggregating \$2,904.

GO TO THE
City Coal Company for coal.
E. L. BIEMARNE,
GUS. H. MOORE.

The "Sunbeam" of a Baptist Church, led by Mrs. Buckner, will hold a picnic in the vacant lot next to the Baptist Church this evening from 5 to 9 o'clock. There will be a substantial luncheon served. Admission 15c and 10c. Let every one come.

WANTED to borrow, \$1,000 on real estate in the county. Inquire at this office. *

The Christian county fair will begin on Thursday Oct. 17, and continue three days. The fair will undoubtedly be the most successful held for years. The country fair, ever since being a patron of this year and as our comes late in the season, after the crops are all housed, there should be a big attendance. The programs are quite interesting and each day's exercises will be filled with attractive features.

FOR SALE—phantom, and pony. Apply at this office.

During the great meeting at the Tabernacle, commencing next Sunday morning, your guests cannot reasonably expect more than one good square meal a day. For luncheon you should supply them with Sarah's chicken, ham, herring, baked pickles, boiled ham, a choice of fresh cakes, imported sardines, ham sliced, dried beef and reception flake crackers from Wall's grocery. *

Sam Jones will lecture at Bowling Green next Sunday and be here by Wednesday without fail. His meeting will begin the tabernacle meeting Sunday.

FOR RENT—the Tandy cottage on the corner of Clay and 16th. Newly painted and papered and in thorough repair. Inquire here.

all the latest styles for fall and winter. These goods will be sold at less than their value.

Cordial invitations extended to all

NOTICE!

We Are Growing. Growing Fast.

We need twice the room we have. Our house is only half as large as we need.

To-day we sold our Furniture Department to Bailey Waller and

will use the space for our other departments. Having over

20 departments we're compelled to have room to en-

large them. Now receiving

NEW GOODS EVERY DAY

and will show the largest stock in this part of Kentucky.

THE RACKET CO.

HOPKINSVILLE, KY.

Jeremiah H. Kugler, Mgr.

PERSONAL GOSPISS.

Mr. S. W. Taliaferro is in Owensboro on business,

Mrs. A. W. Steele has returned from a visit to St. Louis.

Miss Kate Vaughn has returned from a visit to Louisville.

Messrs. Ed. and M. S. Thompson, of Cadiz, were in the city yesterday.

Col. R. A. Burnett and wife spent Tuesday in the city.

Mr. T. L. Edelen, a Frankfort attorney, is in the city on professional business.

Rev. A. G. Fraser, of Bowling Green, was in the city yesterday enroute to Lafayette to visit relatives.

Bob. McDaniel has gone to Nashville to enter the medical institute of that city.

R. H. Perry has returned to Nashville to complete his course at the Vanderbilt Dental College.

Mr. Jno. T. Edmunds is extremely ill with typhoid fever at his home on Main street.

Mr. Josh Boyd, of Elm Creek, Neb., has returned home after a six weeks' visit to his father, Mr. E. H. Sivley, near the city.

Mrs. O. K. Walker, of Austin, Tex., and Mrs. M. E. Bacon, of Garrettsburg, are the guests of Mrs. Cortez Leavel.

Hon. Jas. A. McKenzie, United States Minister to Peru, who is at home on leave of absence, was in the city yesterday for the first time since his return from South America. He has cut off his flowing beard and now has a clean shaven face. He is looking the picture of health and expresses himself as well pleased with his position at Lima. He will return to his station immediately after the election.

SPECIAL LOCALS.

Pyle & Renshaw,

The old reliable Furniture dealers and undertakers. Upstairs in Henry block, Hopkinsville, Ky.

Our friends are in our doggerel.

They want us to let up on Grover,

And stop it with a bang.

The way they can stop you, say,

Or some series new,

Is to keep us in our signature,

And give us more to do.

— PYLE & RENSHAW.

Admirable service.

Christian Circuit Court.

M. GREGORY IN ADM'R.

vs. — Notice.

All persons having claims against the estate of Monroe Gregory, deceased, are required to file them before me, properly proved, by the 15th of October, 1895. W. W. West, Special Commissioner.
